Journal of the American Osteopathic Association
Index to Volume 98

The following index includes only the AUTHOR section of the INDEX to volume 98. The SUBJECT portion of the 1998 INDEX will be published in the January. Monthly page numbers are continuous through each issue. Items indexed from the reader sections are identified by volume page numbers, which are continued from month to month.

Included in the AUTHOR INDEX are entries arranged in alphabetical order for authors of original articles. Also included are listings for authors of signed editorials, reviews, letters, and research abstracts, and AACOM update.

Author Index

Included in this author index are entries arranged in alphabetical order for authors of original articles identified by an asterisk (*), with case reports further identified by the letters "CR." Letters are identified by the letter "L," and research abstracts are identified by the letters "RES." Also included are listings of authors of signed editorials, identified by the letter "E," book reviews, identified by the letters "BR," and software reviews, identified by the letters "SR." Supplements to issues are designated by month and "Suppl."

The editors acknowledge the assistance of the following personnel in compiling the Index to Volume 98: Lynn F. Johnson, MIS, database indexer/project coordinator with the Gibson D. Lewis Library at the University of North Texas Health Science Center in Ft Worth, Tex, with special appreciation to Shannon Sutton for her invaluable help.

Because of the ongoing efforts of Bobby Carter, MS (library director); Ann Brooks, MLS, MBA (associate director of Public Services); Craig Elam, MLS (associate director of Technical Services); and Dohn Martin, MLS (associate director of Biomedical Informatics), the American Osteopathic Association (AOA) and the American Association of Colleges of Osteopathic Medicine (AACOM) have awarded a 5-year contract to Gibson D. Lewis Library, which began in July 1997, to develop a comprehensive osteopathic medical literature database. The database, when completed, will be available to researchers throughout the world via the World Wide Web. The goal of the project is to provide osteopathic medical researchers comprehensive access to this information. Ms Johnson has been serving as the database indexer/project coordinator. As part of the project, the Kirksville College of Osteopathic Medicine (KCOM), Kirksville, Mo, is indexing its historical collection and adding it to the database. Bob Sanders, MA, MEd, is the indexer at KCOM. The AOA and AACOM have appointed editorial and advisory boards to monitor the work on the project.◆
